

## New Features

- **Assignment Management Report**  
Allows Groups to be configured to manage workflow assignments. Group members are able to perform a task on multiple items at a single time without the need for system administrator rights.
- **Support for Adobe PDF Forms**  
Adobe PDF forms are now a supported format for FileBound e-forms. Both AcroForms and XFA Forms are supported.
- **AP Line Item Plug-in for Web Viewer**  
An AP Line Item plug-in has been created that can be used within the Web Viewer. This plug-in is available within the pre-installed plug-ins in the Main Options.
- **Scan In Web Viewer**  
Document scanning functionality has been added within the Web Viewer. This functionality will require the installation of the Viewer Launcher and is only available to PC's using a Windows operating system.
- **Add Multiple Users Functionality**  
Within the Central Administration window system administrators can now add multiple users at one time instead of needing to add each user individually.

## Issues Resolved

A number will appear after any issue that has additional information within the FileBound Partner Portal. To find the additional information visit <http://partnerportal.filebound.com/supportcentral/knownissues> and search for the Issue Number that is listed. (xxx)

- The Un-indexed viewer no longer re-selects all pages after assigning pages to a file. (T11236)

## Features Removed

- **Password Hash**  
Within the Main Options, the **Password Hash** drop-down menu has been removed. This was previously there to allow dual mode operation between a FileBound V4 and V5 site.
- **Imaging Project Property**  
Within the project properties the **Imaging** checkbox has been removed. This was previously there to allow dual mode operation between a FileBound V4 and V5 site.
- **Integration Kit Interaction Property**  
Within the project properties the **Integration Kit Interaction** checkbox has been removed. This was previously there to allow dual mode operation between a FileBound V4 and V5 site.
- **Archive All Files**  
Within the options of the Administrative Functions of the clipboard the **Archive All Files** option has been removed. This same functionality can be done by first clicking the **Select All** checkbox and then **Archive Selected Files**.
- **Delete All Files**  
Within the options of the Administrative Functions of the clipboard the **Delete All Files** option has been removed. This same functionality can be done by first clicking the **Select All** checkbox and then **Delete Selected Files**.
